

Anti Cut Neck Warmer with Carbon Smoke Filter

City armor - The anti-cut neckwarmer from the outside looks like a normal neck warmer, which will allow you not to stand out on the street. Compared to classic neck warmer it provides a very high, 5th (EN 388: 2003) level of cut resistance, which perfectly protects the necks against knife or glass cuts. In addition, our chimney has a pocket with a replaceable carbon PM 2.5 air filter, which prevents 99.9% of dust from entering the lungs, including smog, exhaust fumes, particles of mold or dust, but also bacteria, viruses and other microorganisms.

Description

Key Features of our Armoured Neck Warmer

- The inner layer is made of high-density **UHMWPE fabric**, which provides **a very high, 5th (EN 388: 2003) level of cut resistance**.
- The outer layer is made of **high-quality, quick-drying material**, finished with silver ions. Thanks to this, the chimney has **bacteriostatic properties**, preventing the movement of bacteria from the material to the skin.
- UHMWPE fabric does not lose its protective properties over time (unlike Kevlar) and is suitable for machine washing.

The Armoured Neck Warmer by Street Safe will be delivered to You in a nice package **reusable 2L metal can, 2 PM 2.5 carbon smoke filters** and a sample piece of the **UHMWPE fabric** for own testing.
