Description

Armoured Bandana by StreetSafe is highly cut resistant (Kevlar version provides A2 cut-resistance level), contains a smoke filter and from an outside is not distinguishable from a normal daily use Shawl.

The Armoured Bandana consists of 3 parts:

- **Good quality daily use** bandana is an outside layer. It provides normal look and makes it indistinguishable from other shawls.
- **Cut resistance** is achieved by incorporation of the Cut Resistant Fabric (depending on a version it can be Kevlar, UHMWPE or Cut-Tex Pro) from the inside.
- and a **smoke filter** pocket that provides limited functionality of a gas mask.

The StreetSafe Bandana weights 500 grams. The cut tex pro layer is 75x75 cm and and the bandana is 100x100cm

The Armoured Bandana by Street Safe will be delivered to You in a nice package **reusable 2L metal can, 2 PM 2.5 carbon smoke filters** and a sample piece of the **UHMWPE fabric** for own testing.
